

Proper Use of Disposable Gloves

When you take gloves off for any reason they go in the **GARBAGE (never reuse)!**

Do not use soap or alcohol based hand rub while wearing gloves, as these can break down the material.

Your gloves should **match the size of your hands.**

Never double glove.

Before putting on new gloves, **wash your hands** so you do not contaminate the clean pair of gloves.

New!

When in doubt...**change your gloves!** Gloves should be changed between tasks and between clients.
